

Danger Signals Information Sheet

(Handout for parents to be given on the second day after delivery)

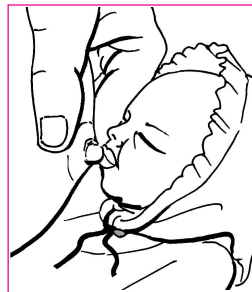

If your baby develops any of the following signals immediately call the ASHA. The ASHA can treat your baby with medicines and injection. She has been treating sick babies in the village and has cured many such babies.

Immediately call the ASHA if baby develops any of the following danger signals :

1 All limbs limp

2 Stops feeding

3 Has fever

4 Is cold to touch

5 Has chest in-drawing

Your baby may be very sick if any of the above danger signals are present

Save the life of your baby by immediately calling the ASHA and by giving the baby correct treatment.
