d. Fits	Emergency / Non emergency

Name of the ASHA : _____

Date : _____

Name of the trainer : _____

Total score : _____

Block : _____

Q 5. Rasheeda gave birth to a baby girl in winter. The TBA delivered the baby and was waiting for the placenta to come out. The ASHA was not present at delivery.

The placenta came out after 25 minutes. Afterwards TBA cleaned the baby and gave it to the mother-in-law. Mother-in-law was happy and took the baby out of the room to show to the father. All family members were happy to see the new arrival.

The baby was placed near the mother who was fast asleep by then. The baby also slept. When the mother woke up the baby was cold to the touch. The mother tried to feed the baby but the baby could not suckle. The temperature of baby was 93° F (33.9° C).

- a. Did baby have hypothermia? Yes / No
- b. Encircle three possible causes of the baby's low temperature.
 - Born in winter
 - Baby not breastfed immediately
 - Baby was a girl
 - ASHA not present at delivery
 - Rasheeda did not deliver at mother's place
- c. Encircle one action that could have prevented the problem
 - Delivery in summer
 - Pulling cord to deliver placenta
 - Drying and wrapping baby immediately
- d. Encircle three steps to re-warm this baby
 - Keep skin to skin with mother
 - ASHA attends delivery
 - Warm the room
 - Refer to hospital immediately
 - Give injection vitamin K
 - Give one dose of cotrimoxazole
 - Feed the baby
- e. Encircle the normal temperature range for newborns
 - 97°F - 99° F
 - 96.4 °F - 100° F
 - 97°F - 98.6° F

Q 6. Shantabai is in labour with her second child. You are called by the family when she goes into labour. The bag of waters breaks spontaneously and the fluid is clear. The baby is born within 8 hours.
